**Subject:** NIGC Class II proposals

WRC Management has noted the following relatively minor issues.

Page 46340 – spelling error, moement should be movement

Page 46347 [5] – Currently, slot machine jackpots can be rounded. This paragraph restricts that capability in Class II games

Page 46347 (2) – The audit mode for the Class II games is more restrictive than for Class III slots in that it requires both a card in a card reader and a PIN. Slots require either a card, a PIN or both.

Page 46347 (4)(i) – This sentence is confusing and open to multiple and perhaps conflicting interpretations. The phrase “as game and system software” should, in my opinion, be changed to read “from game and system software” in order for the sentence to make sense.

46359 [4] – The sentence is too vague and open to interpretation. The phrase, “given period of time” should be given more definitive explanation.

Also, did I hear that NIGC is looking for new candidates for the MICs review committee?

Thanks in advance,

Steve
